

## A Letter From Therese Yewell

### *Dear State Legislator:*

Pepco is well aware that this is a tough year for many of our customers. With the economy in recession, many are having trouble making ends meet.

We are committed to helping our customers manage their winter energy costs. Visit our Web site at [pepco.com](http://pepco.com) and learn more about various payment options such as budget billing, and how to save energy by performing a personalized online energy audit.

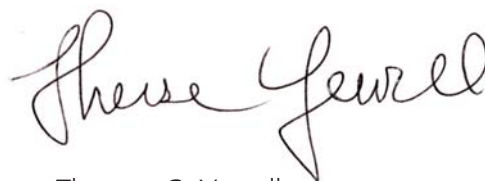

Last year our fall Golf Tournament raised \$210,000 to help area disadvantaged residents pay their winter heating bills. The need will be even greater this year. We are seeking corporate sponsorships for our 2009 Golf Tournament scheduled for September. See page 2 for that story.

Pepco's Guiding Light Leadership Program is in its third year of preparing students for the business world. Fourteen high schoolers from Maryland and the District of Columbia have been paired with a Pepco executive for the hands-on mentoring program that culminates in April. For the full story, turn to page 2.

As always, thanks for reading Community Focus.

Sincerely,

Therese C. Yewell  
State Relations Director, Maryland
